

DESCRIPTION

A new life, in a private urbanization with more than 5,000 m² of common areas. Practice outdoor sports, live nature, relax in the sun in the pool, read on your terrace... Always with the Mediterranean on the horizon. Welcome to the southern PARADISE TO LIVE.

It is a low density residential development located on a hill softly heading towards the sea. The fragmented unit to be built, which consists of a semi-basement garage, two floors and a penthouse, intends to remind with its design the worries and concerns of that group of architects of the second half of the twentieth century (Sáenz de Oiza, Corrales y Molezún, Coderch, among others) who managed to render with respect and dignity the tenets of the Modern Movement to the needs of their works in the Spanish coastline.

The basic components used -rectangular parallelepipeds, partially covered terraced volumes, exterior carpentry consisting of floor to ceiling glass windows, outdoor spaces with native flora, ground floor units with private gardens- organize their hierarchy within an environmental atmosphere where...
