

DESCRIPTION

Come and discover this stunning townhouse, designed to combine comfort, technology, and a sustainable lifestyle.

The basement features a spacious garage with room for two cars, and a multi-purpose room currently used as an art studio. At the back, there is a technical room housing all the systems that make the property largely self-sufficient. The home is equipped with 11 solar panels, which together with the technical systems allow for highly efficient energy consumption. An elevator conveniently connects all four levels of the property. It also includes individual airconditioning systems installed in each room on all levels.

On the ground floor, there are three bedrooms, including one with an en-suite bathroom, and a second fully equipped bathroom that has been adapted with a shower and bathtub accessible for people with reduced mobility. The two front bedrooms open onto a large terrace, while the third bedroom connects to a rear terrace where a professionally installed sauna offers both traditional and infrared options. All bedrooms feature electric blinds installed recently. From this level, the main entrance intercom is...
